

## **REMARKS**

The pending claims have been replaced with claims 25-38. The new claims are supported in the specification from page 62 line 7, to page 68, line 30.

The amendments clarify that a tuning control information is transmitted to a radio controlled timepiece from outside by wireless transmitter. This structure enables non-contact antenna tuning adjustment after the radio-controlled timepiece is placed into an exterior part. Thus, a shift in a tuned frequency caused by a difference in floating and parasitic capacitances can be cancelled out.

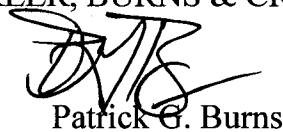

The cited references do not disclose or suggest the presently claimed structure. Accordingly, withdrawal of the outstanding rejections is respectfully requested.

For the foregoing reasons, applicant believes that this case is in condition for allowance, which is respectfully requested. The examiner should call applicant's attorney if an interview would expedite prosecution.

Respectfully submitted,

GREER, BURNS & CRAIN, LTD.
